SUMMARY

Hi, I'm Pratyush — a dedicated FullStack Web and Blockchain Developer with over 3 years of freelance experience in the remote software industry. I specialize in creating fast, responsive, and user-centric web applications and blockchain solutions that help businesses scale and succeed. Whether it's building from scratch or improving existing systems, I focus on performance, usability, and profitability — always delivering on time. Together with my team, we offer a range of Web & Blockchain development services, and we're proud to have worked on impactful projects across eCommerce, marketplaces, healthcare platforms, admin panels, and more. We've collaborated with clients from Europe, Africa, Dubai, the US, and India, building strong relationships and delivering consistent value. Currently building: Hukitola — our official website where we showcase our services, client reviews, and live projects. A cutting-edge Healthcare Web Product designed to enable faster and more efficient medical support. I believe in the principle: "Grow yourself and the people with you." If you're looking for a reliable partner for your next digital project — freelance, contract, or collaboration — feel free to reach out.
